

# PROJECT SNAPSHOT

TOXFREE PROVIDES A TOTAL WASTE MANAGEMENT SOLUTION TO DAMPIER SALT LIMITED

## The issue

Due to previous suppliers not meeting the environmental reporting requirements for Dampier Salt Limited, they required a new total waste solutions provider across their two sites. Dampier Salt previously had several providers across the two sites, making auditing and tracking of waste streams difficult. The new service needed to include environmentally friendly services and efficient waste tracking.

## The solution

Dampier Salt Limited selected Toxfree to become their new waste service provider. The advantages include:

- One service provider for all waste streams onsite.
- A significant saving in cost, due to competitive rates being applied to the contract.
- Auditable processes at Toxfree facilities and tracking to final disposal, including landfill and recycling stations.
- Significant improvements in waste management reporting quantities.
- Several recycling opportunities can now be pursued, including; paper, cardboard, glass, plastic, aluminium cans, rubber, tyres and fluorescent lighting tubes.

## The outcome

Early feedback received from Dampier Salt Limited indicates that they are pleased with the waste management services provided by Toxfree. Dampier Salt have expressed that they are looking forward to a continuing positive working relationship with Toxfree.
