

PROJECT SNAPSHOT

TOXFREE COLLECT UNWANTED AND OLD HOUSEHOLD HAZARDOUS WASTE FOR REDLAND CITY COUNCIL

The issue

Households across Australia often unintentionally accumulate chemicals over time that become unused and past their expiry date. Toxfree provide many services across Australia to help reduce these build-ups and dispose of waste in a safe manner.

The solution and outcome

Toxfree provided safe collection, transport and disposal of household hazardous waste, that could otherwise be harmful to people and the environment. Waste transfer stations are set up by the local council and residents can drop-off their unwanted or expired waste at any time. Toxfree also facilitate a dedicated residential chemical drop-off day, where everyone is welcome to participate. The chemicals are safely transported and disposed of at Toxfree facilities.
