ASX Limited

- **Tox Free opens hazardous waste management facility in Sydney, New South Wales (NSW)**
- **Licence issued by Department of Environment and Climate Change, NSW**

Tox Free Solutions Limited ("Tox Free") is pleased to announce the opening of our first New South Wales Waste Management Facility based in St Marys, Sydney.

The facility is licensed to manage a broad range of hazardous and industrial waste produced by industry, government and the commercial sector. The site will complement the industrial services offered by Barry Bros in NSW and enable Barry Bros to offer integrated industrial and waste management services to the manufacturing and industrial sector.

The strategic location of the facility, combined with its exceptional license offers the advantages of competitive transport infrastructure and the ability to manage a broad range of waste streams. The NSW management team have considerable experience in industrial waste management on the eastern seaboard having combined experience of over 40 years. Tox Free expects the NSW facility to quickly develop as a leading hazardous waste management provider on the east coast.

The purchase of the land including all buildings, plant and equipment was \$2,200,000. The site is purpose built for Tox Free's operations. Tox Free expects the facility to return earnings of \$1,000,000 (EBITDA) during its first year of operation with significant growth expected in the medium term as the client base develops and synergy with Barry Bros services is fully realised.

The St Marys development is one of a number of strategic acquisitions the company expects to complete in the following months as Tox Free progresses with its strategy of creating Australia's leading waste management and industrial service provider.

Further detail on Tox Free's services can be found on the company's website at www.toxfree.com.au

Yours faithfully

TOX FREE SOLUTIONS LIMITED

About Tox Free Solutions Ltd (ASX code: TOX)

Tox Free Solutions Ltd (Tox Free) is one of the largest integrated waste management and environmental services businesses in Australia. The Company offers a full range of waste management services including industrial and hazardous waste treatment, contaminated site remediation and solid and liquid waste

management. The Company also provides complementary industrial services such as vacuum loading, high pressure cleaning and asset maintenance.

The Company's strategically located facilities, unique licenses, best practice technologies and specialised services enable Tox Free to provide a broad range of waste management and industrial services throughout Australia.

Further information about Tox Free can be found by visiting the Company's website at www.toxfree.com.au
